

Dear Kevin,

4/18/92

"Image " magazine of the San Francisco Examiner, 3/29/92 says this, apparently by Tony Summers, about David Phillips:

"Phillips told private detective Kevin Walsh, who had worked as an investigator for the House Assassinations Committee, 'My private opinion is that JFK was done in by a conspriacy, likely including rogue American intelligence people'."

It this true?

Quite remarkable if it is.

If is is true and you can tell me any more about it I'd sure like to know!

I hope against hope that there is some progress in opening the House files up but I fear that if this remains attached to the bills supposedly to bring "all" to light they will all be long delayed and if any one is passed will be vetoed by Bush if it does promise more disclosure, and that as a result what could have been accomplished by a simple resolution will remain undone.

Or is this part of the reason for the all-encompassing bills?

Hope you are all well and that sometime you bet up here when you are not here because you are going past.

Best to everyone,

*Arnold*
